## Experience

Web Developer, **Freelancer** Jul 2023 — Present

- Assisted clients in establishing their e-commerce presence by configuring and customizing Shopify websites.
- Tailored payment and delivery settings to accommodate clients' specific requirements, including options for pickup, shipping, and delivery.
- Customized Shopify themes to align with clients' branding guidelines and design preferences, ensuring a cohesive and professional online presence.
- Collaborated closely with clients to understand their business objectives and translate them into effective e-commerce solutions.

Cybersecurity Analyst Intern, **PetDrifts** Feb 2025 — Mar 2025

- Collaborated with a team of 6 to assess and enhance the security posture of a startup.
- Lead the security assessment of React Native, identifying vulnerabilities and recommending mitigation strategies.
- Contributed to the development of comprehensive security reports, supporting strategic decisions to strengthen the startup's cybersecurity framework.

Frontend Web Developer Intern, **MyBranz** Jan 2024 — Mar 2024

- Utilized HTML, CSS, and ReactJS to ensure precise and responsive implementation of design specifications.
- Led the translation of design mockups into visually engaging, mobile-friendly web components.
- Contributed to maintaining and updating web content to stay aligned with design standards and user expectations.
- Actively pursued continuous learning and skill development to strengthen front-end web development expertise.

## Selected Projects and Achievements

### Video Zone

A YouTube-inspired app built with ReactJS and the YouTube API, featuring video search, playback, and essential functionalities. This project highlights skills in API integration and modern frontend development.

### Amir Roastery

Developed and customized an online store using Shopify's Liquid templating language.

Modified theme structure, adjusted CSS for responsive design, and enhanced product page functionality to improve user experience and brand consistency.

### Cybersecurity Home Lab

Designed and built a virtual lab using **pfSense** for network segmentation and **Splunk** SIEM for centralized log collection. Configured multiple VMs (Kali, Windows, Linux) with traffic monitoring and log forwarding to simulate threat detection and analysis in a segmented environment.
