Jordan Thompson — Data Scientist

Years of Experience: 13
Associate in Data Science

JORDAN THOMPSON
Data Scientist

Toronto, Canada - (555) 555-5555 - jordanthompson@example.com - LinkedIn: linkedin.com/in/jordanthompson

SUMMARY
Seasoned Data Scientist with 13 years of progressive experience developing and deploying predictive models, data pipelines, and actionable insights across diverse industries. Skilled in Python, R, SQL, machine learning, and leading cross■functional teams.

SKILLS
Python - R - SQL - Machine Learning - Deep Learning - Data Mining - Data Visualization - Apache Spark - Hadoop - TensorFlow - Keras - Tableau - Power BI - AWS - Azure - Git - Statistical Analysis - Data Engineering - Feature Engineering

EXPERIENCE

- Directed enterprise■wide analytics initiatives across finance and marketing.
- Implemented scalable data science solutions integrating with AWS Glue.
- Mentored junior analysts and facilitated knowledge■sharing workshops.

- Led a team of 4 data scientists in building real■time fraud detection systems.
- Optimized feature engineering pipelines using Spark and Python.
- Managed cross■departmental projects, ensuring delivery on time and budget.

- Developed predictive maintenance models reducing downtime by 22%.
- Designed and deployed end■to■end machine learning workflows on Azure.
- Presented insights to senior leadership, influencing product strategy.

- Built recommendation algorithms that improved customer engagement by 15%.
- Implemented an A/B testing framework to evaluate model performance.
- Collaborated with data engineers to streamline ETL pipelines.

- Collected and cleansed transactional data for quarterly reporting.
- Performed descriptive statistical analysis to identify key business metrics.
- Created dashboards in Tableau to track operational KPIs.

EDUCATION

Associate in Data Science, Northern Community College - Winnipeg, Canada
2009
